WORK EXPERIENCE

Full-stack Developer

Homecareinuk, England

Sep 2022 - Present

Company specializes in providing compassionate and personalized homecare services for adults, ensuring their comfort and well-being in the familiarity of their own homes.

- Increased website performance, updated and implemented optimized layouts that met usability and performance requirements using React and Redux for integration and cross-browser compatibility.
- Analyzed designs and increased website performance up to 60% to meet specific requirements, such as quick-loading with particular layouts and increasing user accessibility.
- Wrote tests using Jest and React-testing-library, reviewed and tested customer-facing prototypes before deployment and applied best practice diagnostic techniques to verify usability.
- Took charge of developing MVP and working overtime to ensure that it got completed by the deadline and completed 100% of deadlines ahead of schedule.

Front End Mentor

VGostar, Kurdistan

Jun 2022 – Present

My role in this company has been providing training in front-end programming to participants and interns. These training sessions begin with the basics, covering HTML, CSS, and JavaScript. In the intermediate level, the training includes instruction in React and Tailwind.

- We prioritize the growth and development of new trainees through comprehensive mentoring and guidance.
- We provide training in cutting-edge technologies and techniques for creating dynamic and visually appealing websites.
- Empowering trainees with clear roadmaps and step-by-step guidance to navigate the complex world of web development and achieve their goals.

Front End Developer

Almiran, Oman

Aug 2022 - Sep 2022

As an import and export company, we facilitate seamless global trade by connecting businesses with high-quality products and expanding market opportunities.

- Managed full-cycle design tasks, handling all phases from developing to deploying while maintaining guidelines.
- Trained new developers of the team to develop ongoing projects and maintain developed projects.

- Designed and prepared end-to-end product features in collaboration with UI/UX designers and stakeholders.
- Reviewed code to validate structures and refactored the old-technology designs using modern tools for maintainability, functionality and optimization.
